

ABOUT US

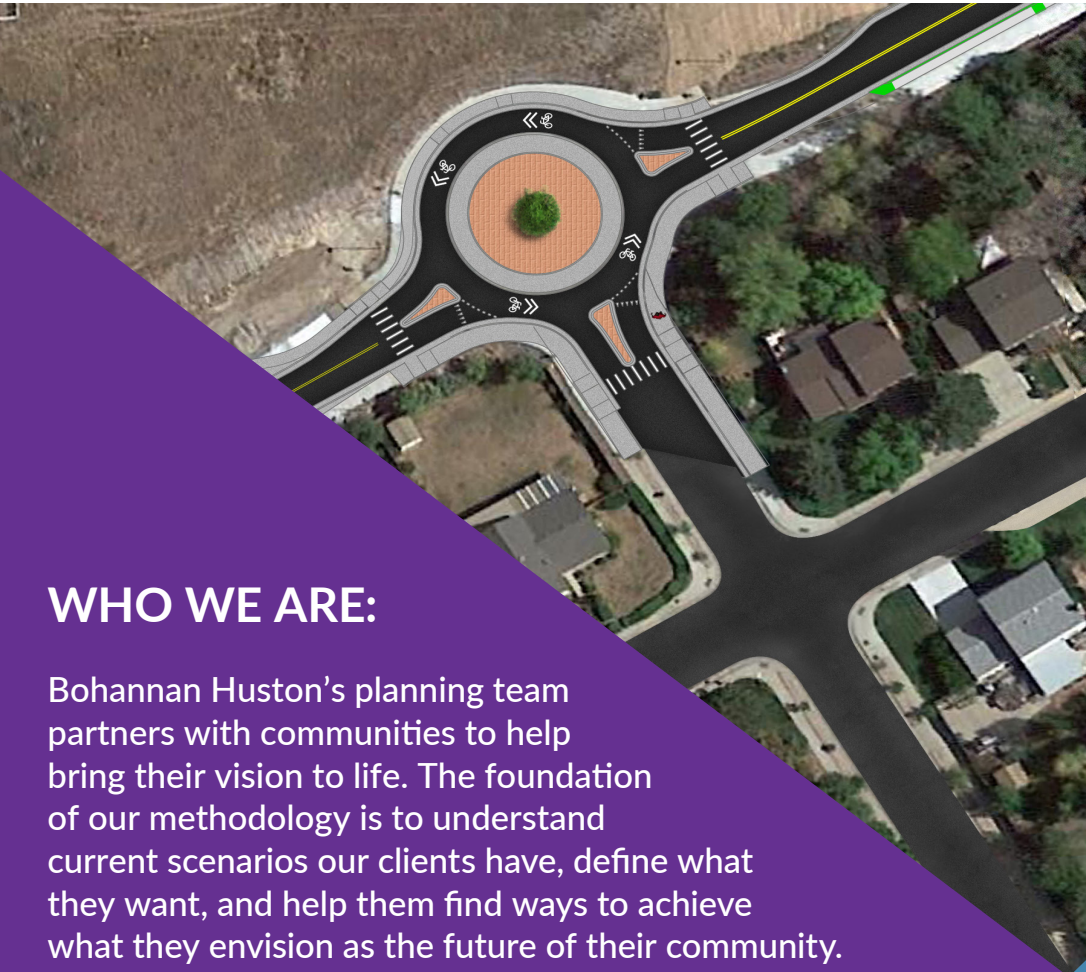

Denise Aten, AICP
Senior Vice President and
Planning Group Leader

Denise Aten, AICP, has extensive experience in planning throughout New Mexico and Colorado, where she has successfully implemented a wide range of infrastructure planning projects, land use code developments and updates, as well as corridor studies. She builds strong connections with the local community, integrates best management practices, and creates the most appropriate solutions to a variety of planning scenarios and engagement, agency coordination, and transportation/land use connections.

Derrick Webb, AICP
Vice President
Senior Planner

Derrick Webb, AICP, brings his expertise to communities across Colorado and New Mexico, where he has managed transportation plans, land use code developments and updates, design standard developments, and corridor studies. He has also built a strong skillset supporting communities in identifying appropriate housing strategies and implementing programs, subsidies, and policy updates to realize their planning-related vision.

WHO WE ARE:

Bohannon Huston’s planning team partners with communities to help bring their vision to life. The foundation of our methodology is to understand current scenarios our clients have, define what they want, and help them find ways to achieve what they envision as the future of their community.

PLANNING

Services We Provide

Our team develops solutions that are community-oriented, innovative, resilient, context sensitive, and aligned with funding options. We create comprehensive recommendations and products in response to the various needs and goals of agencies, stakeholders, organizations, and the public.

LAND USE AND POLICY

BHI planners recognize the valuable connection between land use and infrastructure. We integrate demographics, growth patterns and housing options to create successful, implementable, and sustainable solutions. We offer:

- Comprehensive Plans
- Housing Needs Assessments
- Land Use Code Updates
- Demographic/Socioeconomic Analysis and Forecasting

MULTI-MODAL

Our transportation planning skills include a special focus on multi-modal and non-vehicular facilities. We integrate connectivity and operations into our general approach for roadway projects, as well as mode-specific plans and studies. Our skill set includes:

- Bicycle and Pedestrian Master Plans
- Pedestrian and Trail Crossings
- Pedestrian and Bicycle Level of Service
- Complete Streets Design and Analysis
- Multimodal Facility Standards
- Transit Oriented Development (TOD) Connections

TRANSPORTATION PLANNING

BHI planners focus on supporting sustainable growth, increased multi-modal connectivity, and economic development while integrating vehicular, transit, bicycle and pedestrian facilities into projects. BHI services include:

- Transportation Master Plans
- Parking Strategies
- Traffic Calming Studies
- Corridor Studies
- Safety Action Plans
- Crash Analysis

ENGAGEMENT

A critical component of most planning initiatives, the engagement process includes strategies for building trust, providing multiple opportunities for input and maintaining continuous lines of communication. Our approach includes:

- Public Events
- Mobile Workshops
- Design Charrettes
- Project Websites
- Interactive Maps
- Pop-Up Events
- Focus Groups
- Pilot Projects
- Questionnaires
